PROJECT INFORMATION & SUBMISSION FORM

Project Name *[provide title/name to help identify the project]* Pilots Guide to Medical Certification

STEM College *[please select a STEM discipline from the drop down menu]* Physical Sciences

Project Category *[select project category or write in if not found on list]* Health & Biological Sciences

Problem Identification *[clearly define the problem or opportunity for which you are seeking a solution, and provide any relevant historical/background information]*

Problem: Newer pilots who do not understand what an FAA medical certificate requires, how to obtain one, and the steps/hacks to get get through the process successfully.

Sub problems:
where do they obtain accurate information,
what information needs to be disclosed on their medical,
what happens if they disclose,
how do they easily find the information that will help them,
what happens if the physician they see (Aviation Medical Examiner) is unable to give them a medical certificate

Project Objectives *[list/describe the desired outcome, problem resolution, end product or opportunity taken]*

Create a web platform/website/page (must be within FAA acceptable framework) that is easy for new pilots to find.
Make it a page they want to use and easy to navigate.
Fill it with information that makes sense to to a new pilot.
With correct medical content (provided), develop tools to help new pilots obtain correct answers to their medical questions.

Make sure pilots know they should first get healthy, take care of their health, see their physicians if they do have a medical concern, understand medical concerns with being a pilot, then work on their medical certificate

Project Requirements *[define the business (why project is happening), solution (functional & non-functional), design specifications, and/or stakeholder requirements that align with the project's resources and objectives]*

Increase in pilot medical certificate applications over past 2 years. They often have medical conditions including mental health issues and think their pilot career is over before it starts.

Solutions: Educate pilots on where to find accurate information on what they need to provide and what to expect in the process.

Design specs: Continue the work that occurred in the fall 2025 and spring 2026 semesters with Dr. Abdulhak's student team. The previous student teams prototyped many different concepts including AI assisted searches, interactive graphics, and JSON files to demonstrate the art of possible with AI along with the accuracy of results and presented them to FAA CAMI leadership. The concepts are

Project Constraints *[identify any known limitations and barriers, e.g., budget, staff, size, specs, technology, etc.]*

Must use fall 2025and spring 2026 student research as the beginning point for the spring 2026 semester.
Must have familiarity a comfortability working with artificial intelligent.
These results may be integrated into a larger project.

PROJECT INFORMATION & SUBMISSION FORM

FAA Sponsor Division Name Aerospace Medicine - Medical Specialties Division

FAA Sponsor Routing Symbol AAM-220

MAIL STOP/ADDRESS:

AAM-400
CAMI

FAA PROJECT POC:

Name Michael Coffman
Title AME Education
Phone 405-954-6510
E-mail michael.coffman@faa.gov

FAA PROJECT POC:

Name Judith Frazier MD MBA
Title Manager Policy and Standards
Phone 405-954-3711
E-mail judith.frazier@faa.gov

Office Use Only *[this section to be completed by AMC-3]*

Project Name/Title Pilots Guide to Medical Ce

Semester Fall 2025

UNIVERSITY FACULTY POC:

Name Dr. Mansoor Abdulhak
Title Professor
Phone 405-325-5408
E-mail m.hak@ou.edu

University Assignment University of Oklahoma

STEM College Physical Sciences

Status Project Accepted & Assigned

COMMENTS:
